

COMPANY HISTORY

Hartman and Hartman Inc. is proud to be on the leading edge of the zero-carbon initiative for some of the nation's largest oil and gas companies that are committed on achieving zero methane emissions. By collaborating with our customers, we strive to provide compressed air packages offering the optimum solution for your application.

Hartman and Hartman hit the ground running in 1978 and we're proud to say we've never stopped. At our inception, we served the industrial construction needs of the coal industry. Today, we're proud to be a successful industrial contractor in the ever-expanding natural gas industry, all while keeping a presence in our industrial construction base. Innovation and continuous education have been essential to us since the very beginning. As the market continues to evolve, so have we. Our aim is to exceed the expectations of our customers with an unwavering commitment to safety, attention to detail, and forging strong relationships.

COMPANY PROFILE

Hartman & Hartman, Inc. is a self-performing general contractor established in 1978 offering industrial construction services. As a merit shop, we have served the manufacturing, chemical, glass, steel, nuclear, power generation, and oil and gas industries for over 40 years. Our four divisions include Mechanical, Civil, Electrical, and Automation services to our clients.

SAFETY. EXCELLENCE. RESPECT. VISION. ETHICS.

Civil Division

- Design build capabilities
- Precision concrete work
 - Equipment foundations
 - Tank foundations
 - Building foundations
- Specialty Concrete work
 - Dam and spillway foundations
 - Caisson installation (all depths and diameters)
 - Containments
 - Slab on grades
- Equipment grouting
- Access platforms and walkways
- Supply and install over-head crane
- Supply and install pre-engineered buildings
- Structural steel fabrication
- Structural welding services
- Design and installation of helical pile foundations
- Bulk air excavation (soft dig)
- Industrial paint and coating
- Demolition
- Plant relocation
- Industrial equipment hauling

Mechanical Division

- Design build capabilities
- Process pipe fabrication and installation
- Nuclear-grade piping
- Facility retrofits and upgrades
- Industrial plant maintenance
- Pipe welding services
- Roustabout services
- Millwrighting capabilities
 - Instrument tubing
 - Equipment setting and rigging
 - Equipment rebuilds and repair
 - Coupling alignment
 - Conveyor alignment
 - Crane rail alignment
 - Bucket elevator alignment
- Hydro testing
- Pneumatic testing
- Industrial coatings
- Demolition

Electrical Division

- Electrical upgrades and maintenance
- Machine control systems and cabling
- Motor control centers
- Switch gear
- In-plant distribution systems
- Preventative maintenance
- Service agreements
- Maintenance contracts
- Lighting systems
- Medium and low voltage construction
- Grounding/bonding installation and testing
- Heat trace
- Hazardous locations
- Thermal imaging
- Compressor stations
- Well pads
- Meter stations
- Solar
- Thermal electric generators
- Substation installation
- Underground utilities

Electrical Fabrication Shop

- Customizable to your needs and can be equipped and ready for external field connections.
- Fabricated Buildings
 - Compressed Air Packages
 - Electrical & VFD Buildings
 - Control & Network Buildings
 - RTU buildings
 - Security buildings
- Fabricated Skids
 - Compressed Air skids
 - Flow Metering Skids
 - Power Distribution Skids
 - Portable RTU Skids
 - Methanol injection Totes
- Miscellaneous
 - Emergency Power and Air Trailer
 - Utility Service Racks
 - Pump Control Racks

Panel Shop Division

- UL508A certified
- Control panel fabrication
- Drive panel fabrication
- PLC panel fabrication
- Junction boxes
- Instrument and panel stands
- Instrument and power skids
- Custom electric motor control centers
- Control buildings (E-Houses)
- Power distribution racks/skids
- Pump skids
- Instrument air buildings
- Panel point-to-point testing
- Equipment assembly, setup, and testing
- Retrofit or modernize existing control panel

Automation and Control Division

- Expertise
 - Process control
 - Machine control
 - Motion control
 - Motor control
- Detailed Design
 - Instrumentation
 - Control panels
 - Industrial Networks
 - Facility electrical
 - AutoCAD
- Software development
 - PLC Programming
 - RTU Configuration
 - HMI graphic design
 - SCADA
 - Reporting
- Onsite installation
 - System commissioning
 - Field startup and service
 - Instrumentation
 - VFD and motor setup
 - Network testing

CAPABILITIES

- Design Build Capabilities
- Automation & Controls
- Equipment Upgrades
- Retrofitting Facilities
- Electrical System Integrator
- Equipment & Building
 - Concrete Foundations
- Facility Upgrades & Expansions
- Metal Buildings
- Sound Wall Installation
- Containment Installation
- Complete Electrical Construction
- Substation Construction
- PLC & Drive Panel Fabrication
- PLC & Drive Installation & Programming
- In House Panel Shop
- Control Design & Installation
- Instrumentation Piping & Wiring
- Site & Security Lighting
- Underground Utilities
- Equipment Rigging
- Pipe Welding & Installation
- Excavation
- Air Excavation
- Network Testing
- Preventative Maintenance Contracts
