| First-aid measures after eye contact | : In case of contact, immediately flush eyes with plenty of water. Remove contact lenses, if worn. If irritation persists, get medical attention. |
|--|---|
| First-aid measures after ingestion | : If swallowed, do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical advice/attention if you feel unwell. |
| .2. Most important symptoms and effect | |
| Symptoms/injuries after inhalation | : May cause respiratory tract irritation. May cause drowsiness, dizziness and central nervous system |
| | depression. |
| Symptoms/injuries after skin contact | : May cause skin irritation. Symptoms may include redness, drying, defatting and cracking of the skin. May cause frostbite on contact with the liquid. |
| Symptoms/injuries after eye contact | : May cause eye irritation. Symptoms may include discomfort or pain, excess blinking and tear production, with possible redness and swelling. May cause frostbite on contact with the liquid. |
| Symptoms/injuries after ingestion | : Not a normal route of exposure. |
| .3. Indication of any immediate medical | attention and special treatment needed |
| Symptoms may not appear immediately. In case of a | accident or if you feel unwell, seek medical advice immediately (show the label or SDS where possible). |
| | |
| SECTION 5: Firefighting measures | |
| .1. Extinguishing media | . Water arrow water for dry chamical placed resistant form on the divide |
| suitable extinguishing media | : Water spray, water fog, dry chemical, alcohol resistant foam, carbon dioxide. |
| Insuitable extinguishing media | : None known. |
| .2. Special hazards arising from the sub | ostance or mixture |
| ire hazard | : Flammable aerosol. Products of combustion may include, and are not limited to: oxides of carbon, hydrofluoric acid, carbonyl fluoride. |
| Explosion hazard | : Heat may build pressure, rupturing closed containers, spreading fire and increasing risk of burns and injuries. |
| .3. Advice for firefighters | |
| irefighting instructions | : DO NOT fight fire when fire reaches explosives. Evacuate area. Vapors are heavier than air |
| | and may travel considerable distance to an ignition source and flash back to source of vapors. |
| rotection during firefighting | : Keep upwind of fire. Wear full fire fighting turn-out gear (full Bunker gear) and respiratory protection (SCBA). |

| 8.2 | 2. Exposure controls | |
|-----|--------------------------------|--|
| Ар | propriate engineering controls | : Use ventilation adequate to keep exposures (airborne levels of dust, fume, vapor, etc.) below recommended exposure limits. |
| Ha | nd protection | : Wear suitable gloves. |
| Eye | e protection | : Safety glasses with side shields. |
| Ski | in and body protection | : Wear suitable protective clothing. |
| Re | spiratory protection | In case of insufficient ventilation, wear suitable respiratory equipment. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
| En | vironmental exposure controls | : Maintain levels below Community environmental protection thresholds. |
| Oth | her information | : Do not eat, smoke or drink where material is handled, processed or stored. Wash hands carefully before eating or smoking. Handle according to established industrial hygiene and safety practices. |
